# JOB DESCRIPTION

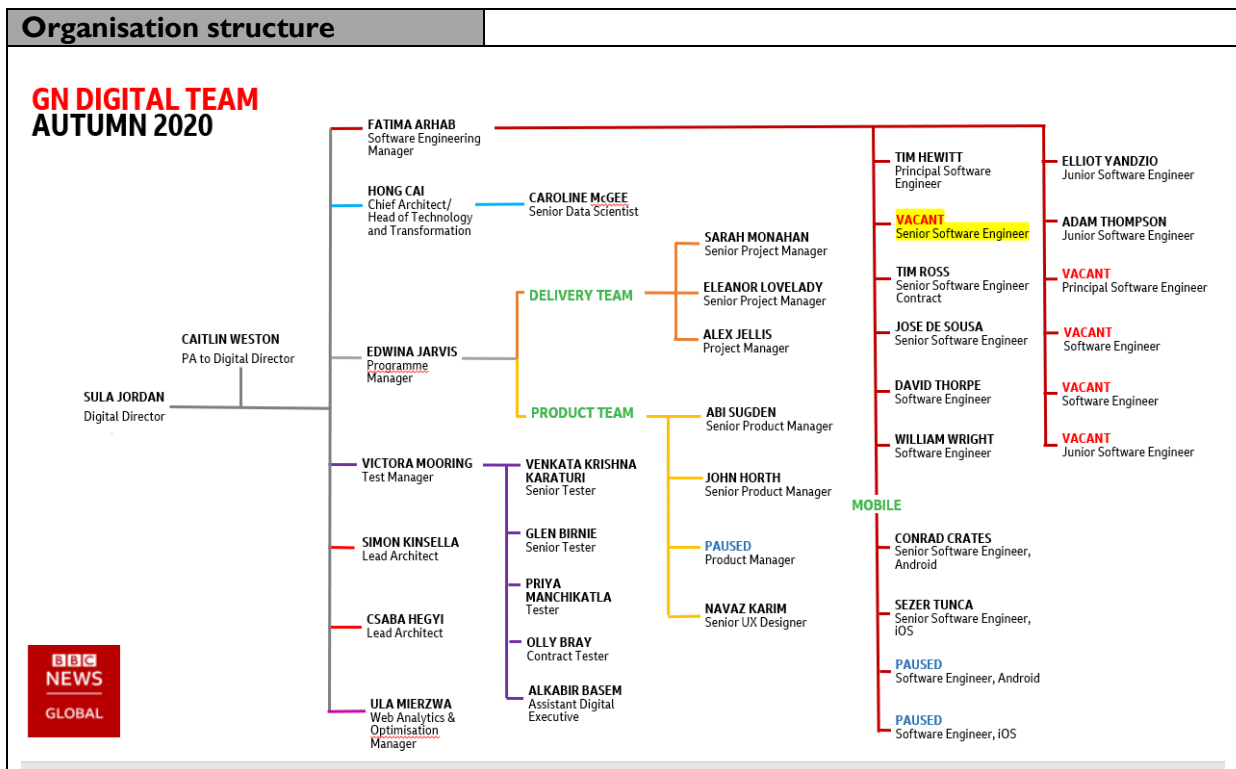

This job description is a written statement of the essential characteristics of the job, with its principal accountabilities, incorporating a note of the skills, knowledge and experience required for a satisfactory level of performance. This is not intended to be a complete, detailed account of all aspects of the duties involved.

## [Appendix

There may be sub-sets of the generic job described above which require additional technical skills. This appendix to the generic job description can be developed to cover such situations.

<b>Division</b>	<b>BBC Global News</b>
<b>Reports to (title)</b>	<b>Software Engineering Manager</b>
<b>Location base</b>	<b>BC, W12 (Remote)</b>

### Additional job specific responsibilities and accountabilities

This is an exciting opportunity to join BBC Global News; a commercial company in the BBC Group and one of the world's leading news and media organisations. As a global business of c400 employees in 12 countries Global News is responsible for a portfolio of award-winning commercial websites and products including:

- [www.bbc.com](http://www.bbc.com)
- [www.bbc.com/news](http://www.bbc.com/news)
- [www.bbc.com/sport](http://www.bbc.com/sport)
- [www.bbc.com/future](http://www.bbc.com/future)
- [www.bbc.com/worklife](http://www.bbc.com/worklife)
- [www.bbc.com/culture](http://www.bbc.com/culture)
- [www.bbc.com/reel](http://www.bbc.com/reel)

The Senior Software Engineer will be a key member of a vibrant agile development team looking to turn great ideas into engaging digital products while maintaining and improving existing

codebases.

### THE CANDIDATE

We are looking for an experienced Software Engineer with a broad knowledge of JS, HTML, CSS and NodeJS as well as scalable and highly available microservices architecture.

The candidate must also be comfortable supporting older technologies and browsers such as IE11. The ideal candidate will have a real enthusiasm for writing clean, concise, testable code, along with knowledge of all things responsive.

### KNOWLEDGE & EXPERIENCE

#### Required

- Excellent knowledge of JavaScript (ES2015/ES6)
- Excellent knowledge of HTML5 and CSS3
- Experience using CSS pre-processors - LESS, SASS
- Experience building and maintaining large scale React with Redux applications
- Experience building Progressive Web Apps, Service Workers and offline available websites
- Experience with isomorphic React applications
- Experience designing and integrating with external APIs
- AWS: EC2, S3, CloudFormation, Route 53, AWS Lambda Functions, SNS, SQS, DocumentDb
- Functional Programming design patterns
- Experience using JS build tools – Grunt, Gulp, Webpack
- Experience with JS module loaders (Require, AMD)
- Experience with NodeJS, Express, npm
- Experience writing testable code (TDD, BDD or similar)
- Understanding of performance optimisation on high traffic websites
- Accessibility Standards
- Responsive web design
- Working knowledge of cross-browser issues on both PC and Mac (including IE11)
- Experience of working within an Agile software development environment and ticketing systems like JIRA
- Excellent written and verbal communication and presentation skills
- Excellent attention to detail

#### Desirable

- Experience with JS libraries/frameworks (React, Underscore, Backbone)
- Refactoring
- Working knowledge of Golang
- Understanding of microservices and a highly available infrastructure
- Working knowledge of AWS
- Working knowledge of Docker and other deployment technologies
- Managing and mentoring Junior Software Engineers

Nice to have

- Working knowledge of GraphQL
- Working knowledge of Storybook
- Understanding of Atomic design
- Working knowledge of A/B tests
- Experience with Adverts integration
- Experience with custom CMS integration at large scale
- Experience with data migration

**Approval**
